1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-60 is that none of the references cited, taken either singly or in combination, teach or disclose a method of diverting a treating fluid in a subterranean formation penetrated by a wellbore, as in the claimed combinations, including steps (d) and (e) of claims 1 and 44, and the steps (a), (d) and (e) of claims 8 and 26. In this regard, it noted that references to Erbstoesser et al (4,716,964; 4,387,769), Cooke, JR (2004/0231845) and Himes et al (5,191,931) discloses the use of a degradable or dissolvable particulate material as a diverting agent, but which is removed by connate water or water injected into the well or formation, rather than a "source of releasable water" which is released in the formation. Mondshine (4,620,596) and Monoz, Jr. et al (6,896,058) disclose use of an anhydrous or hydrated borate salt as a bridging or diverting agent is subsequently removed by dissolving in connate or water injected or circulated in the well, rather than being introduced in a particulate admixture with a degradable particulate which is degraded by water released in the formation from a hydrated organic or inorganic compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).
